

Privacy Impact Assessment Register

In accordance with the Privacy (Australian Government Agencies – Governance) APP Code 2017, NAIF publishes a Privacy Impact Assessment Register on the NAIF website on a bi-annual basis. The Privacy Impact Assessment Register lists Privacy Impact Assessments for all projects that:

- Involve a significant change to how we manage personal information; and
- Might have a significant impact on the privacy of individuals.

NAIF conducts Privacy Impact Assessments (PIAs) for projects with high privacy risks. Throughout the assessment process, we:

- Identify elements of the project that may impact an individual's privacy;
- Devise strategies to manage, reduce, or eliminate any potential impacts; and
- Publish the assessment outcomes on this page for transparency.

Title of PIA	Short Description	Date of Assessment
NAIF Risk and Compliance System Uplift	Recommended revision to the privacy policy and collection notices, with various other risk treatments recommended.	September 2023
